

IN THE CLAIMS:

On page 7 at line 1, please remove the word "CLAIMS:" and insert the following heading:

--What is Claimed is:--

Please amend the claims as follows:

1. (currently amended) A reservoir for a source of a gaseous, gas borne or droplet substance to be used in a dispenser, the reservoir having:
 - a major portion having a comparatively large cross-section of its substance space and
 - a minor portion having a comparatively small cross-section of its substance space,the reservoir being translucent,~~and preferably~~ or transparent, at the minor portion at least, whereby a user can note a comparatively rapid depletion with use of the quantity of substance remaining when the source approaches exhaustion of the substance.
2. (original) A reservoir as claimed in claim 1, wherein the minor portion has a constant cross-section.
3. (original) A reservoir as claimed in claim 1, wherein the minor portion has a progressively diminishing cross-section, whereby the rate of fall of the level of the substance increases as it is further depleted.
4. (currently amended) A reservoir as claimed in claim 1, ~~claim 2 or claim 3~~, wherein the minor portion is the opposite end of the source from its release valve, ~~with the~~ so that a user when holding the dispenser valve-up ~~[[to]]~~ can observe the level of the substance in the minor portion.

5. (currently amended) A reservoir as claimed in claim 1, ~~claim 2 or claim 3~~, wherein the minor portion is provided at the valve end of the reservoir as a diminishing cross-section neck.
6. (currently amended) A reservoir as claimed in ~~any preceding~~ claim 1, wherein the reservoir is of glass.
7. (original) A reservoir as claimed in claim 6, wherein the glass reservoir is enclosed in a plastics material sheath.
8. (original) A reservoir as claimed in claim 7, wherein the plastics material sheath is a shrink wrapping or an insert moulding.
9. (currently amended) A reservoir as claimed in ~~any one of claims 1 to 5~~ claim 1, wherein the reservoir is of transparent/translucent plastics material.
10. (original) A reservoir as claimed in claim 9, wherein the reservoir is enclosed by a robust, impermeable outer enclosure.
11. (currently amended) A reservoir as claimed in ~~any preceding~~ claim 1, wherein the reservoir is provided with an insert, which substantially reduces the cross-section thereof.
12. (original) A reservoir as claimed in claim 11, wherein the insert is formed as part of a component of the valve in the source for metering a dose from its reservoir.
13. (currently amended) A reservoir as claimed in claim 11 ~~or claim 12~~, wherein the insert is parallel.

14. (currently amended) A reservoir as claimed in claim 11 ~~or claim 12~~, wherein the insert is tapered.

15. (currently amended) A source for a dispenser of a gaseous, gas borne or droplet substance from the source, the source having a reservoir as claimed in ~~any preceding~~ claim 1.

16. (currently amended) A dispenser for a gaseous, gas borne or droplet substance having a source of the substance as claimed in ~~any preceding~~ claim 1.
